

# **You're One of a Kind**

Although mass production has been a boon to mankind, clothing your body may not be best served by a mass produced garment. It's good to know that you can still have your personal preferences of style, fit and fabric taken into consideration. At Suited To You, your tailored clothing is designed to fit your physique and lifestyle. We eliminate the frustration of trying to find your "size" amid colors and fabrics meant to appeal to the greatest potential number of buyers. You can relax knowing that your clothing will fit properly and complement your shape. Your Made-to-Measure and Custom-Made clothing are crafted and detailed meticulously for both form and function.

Because we work independently of designer's seasonal offerings, your clothing can reflect your individual sense of style and personality for years to come. Instead of replacing valuable wardrobe items annually, you will find that your Made-to-Measure and Custom-Made garments can give years of service, increasing their value and offering a better return on investment. All of this attention to detail takes time, but it's worth the wait. And, when you wear them, you'll never want to wear anything else!

You work to make a difference in the lives of your clients...let us make a difference in yours.
